Regulatory Compliance Information
Getting Started

AirPort Express provides simultaneous dual-band wireless 802.11n Wi-Fi networking for all your wireless devices, including Mac and Windows computers, and iOS devices such as iPad, iPhone, iPod touch, and Apple TV.

When you set up your AirPort Express Base Station, it creates two high-speed Wi-Fi networks:

- a 2.4 gigahertz (GHz) network for 802.11b, 802.11g, and 802.11n devices, such as iPhone, iPod touch, and older computers
- a 5 GHz network for 802.11n and 802.11a devices

Your wireless devices join whichever network provides the best performance and compatibility.

You can use AirPort Express to share your Internet connection with all the wireless devices on your network, share a network printer, and connect to other devices.

Your AirPort Express also comes with AirPlay, an easy way to play your iTunes music through your home stereo or remote speakers.
Chapter 1 Getting Started

## Ports on Your AirPort Express

AirPort Express has five ports on the back:

<table>
<thead>
<tr>
<th>Icon</th>
<th>Port Description</th>
</tr>
</thead>
</table>
| 🔄 | **10/100Base-T Ethernet Wide Area Network (WAN) port**  
For connecting a DSL or cable modem, or for connecting to an existing Ethernet network |
| ↔️ | **10/100Base-T Ethernet Local Area Network (LAN) port**  
For connecting Ethernet devices such as printers or computers, or for connecting to an existing Ethernet network |
| 🌍 | **USB port**  
For connecting a USB printer |
| 🎧 | **Analog and optical digital audio stereo mini-jack**  
For connecting AirPort Express to a stereo or powered speakers |

| | **Power port**  
For connecting AirPort Express to an AC power source |

Next to the ports is a reset button for troubleshooting your AirPort Express. The status light on the front of AirPort Express shows its current status.
Before you plug in your AirPort Express, first connect the appropriate cables to the ports you want to use—including:

- An Ethernet cable connecting your DSL or cable modem to the WAN port (if you’ll connect to the Internet)
- An audio cable connecting your stereo to the audio out port (if you’ll use AirPlay to play music from your iTunes library)
- A USB or Ethernet cable connecting a printer to the USB or Ethernet port (if you’ll print to it using AirPort Express)

After you connect the cables for all the devices you plan to use, plug the AirPort Express power cord into the power port and a power outlet. There’s no on/off switch.

When you plug the AirPort Express power cord into a power outlet, the status light glows amber during startup, and then flashes amber during setup. The status light glows green after your AirPort Express is set up and connected to the Internet or a network.
## AirPort Express Status Lights

The following table describes AirPort Express status light sequences and what they indicate.

<table>
<thead>
<tr>
<th>Light</th>
<th>Status/description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>AirPort Express is unplugged.</td>
</tr>
<tr>
<td>Solid green</td>
<td>AirPort Express is on and working properly.</td>
</tr>
<tr>
<td>Flashing amber</td>
<td>AirPort Express is not set up or cannot establish a connection to the network or the Internet. Use AirPort Utility to find out the cause. See “If Your AirPort Express Status Light Flashes Amber” on page 23.</td>
</tr>
<tr>
<td>Solid amber</td>
<td>AirPort Express is starting up.</td>
</tr>
<tr>
<td>Flashing amber and green</td>
<td>There may be a problem starting up. AirPort Express will restart and try again.</td>
</tr>
</tbody>
</table>
Using AirPort Express

With AirPort Express, you can:

• Create a password-protected wireless home network, and then connect to the Internet and share the Internet connection with computers and other wireless devices, such as iPad, iPhone, and Apple TV.

• Create a guest network, with or without password protection, to give wireless Internet access to friends and visitors. Devices that connect to the guest network only have access to the Internet.

• Connect your AirPort Express to your Ethernet network. Wireless-equipped Mac and Windows computers and other wireless devices can then access the network without being connected by a cable.

• Connect a USB or Ethernet device, such as a printer, to your AirPort Express. All the computers on the AirPort network can access the device.

• Connect your stereo or powered speakers to your AirPort Express, and then use AirPlay to play your iTunes library from any computer or iOS device.

The AirPort Express Network

The following illustration shows an AirPort Express connected to the Internet by a modem and creating a wireless 2.4 and 5 GHz network. The AirPort Express is connected to powered speakers, so any computer or iOS device on the network can play music through the speakers using AirPlay. It’s also connected to a network printer using Ethernet, so all of the computers on the network can print to it.
See the next chapter, “Setting Up AirPort Express,” to find out how to use the AirPort software on your computer or on an iOS device to set up your AirPort Express and your wireless network.
Setting Up AirPort Express

Use AirPort Utility on your computer or Wi-Fi settings on an iOS device to do one of the following:

- Set up your AirPort Express to create a new network that wireless computers and devices can use to connect to the Internet.
- Set up your AirPort Express to join an existing network. If the network is connected to the Internet, all the computers and wireless devices on the AirPort network can use the Internet connection. If the network is set up to be extended, AirPort Express can extend the range of that network.

You can do all of your basic network setup and configuration with the setup assistant in AirPort Utility on a Mac or Windows computer, or with Wi-Fi settings on an iOS device. To manage your network and configure advanced options, see "Setting Advanced Options" on page 14.

System Requirements

**To set up AirPort Express using a Mac, you need:**

- A Mac computer with an AirPort card installed (to set it up wirelessly), or a Mac computer connected to your AirPort Express with an Ethernet cable (to set it up using Ethernet)
• Mac OS X v10.5.7 or later
• AirPort Utility v5.6.1 or later

Use Software Update to get the latest version of AirPort Utility.

To set up AirPort Express using a Windows PC, you need:
• A Windows computer with a 300 MHz or higher processor and Wi-Fi certified wireless capability (to set it up wirelessly), or a Windows computer connected to the AirPort Express with an Ethernet cable (to set it up using Ethernet)
• Windows 7 (SP1)
• AirPort Utility for Windows v5.6.1 or later

To set up AirPort Express using an iOS device, you need:
• An iPad, iPhone, or iPod touch with iOS 5 or later

You need iTunes v10.4 or later in order to play audio from your computer to a stereo connected to AirPort Express.

You can use AirPort Express with any wireless device that’s Wi-Fi certified.

If you’re using AirPort Express to connect to the Internet, you need a broadband (DSL or cable modem) account with an Internet service provider, or a connection to the Internet using an existing Ethernet network. If you received information from your service provider, such as a static IP address or a PPPoE user name and password, you may need to enter it. Have this information available before you set up your AirPort Express.
Setting up AirPort Express

To set up AirPort Express using a computer:
1 Open AirPort Utility. It’s located in /Applications/Utilities/ on a Mac, and in All Programs on a Windows computer.
2 Select your AirPort Express and click Continue.
3 Follow the onscreen instructions for creating a new network or joining an existing one.
   If you’re using Mac OS X, you can use the Wi-Fi status menu in the menu bar to choose your AirPort Express. When you choose it, AirPort Utility opens to set up your AirPort Express.

To set up AirPort Express using an iOS device:
1 Tap Settings on the Home screen, and then tap Wi-Fi.
2 Tap the name of your AirPort Express.
3 Follow the onscreen instructions for creating a new network or joining an existing one.
   Wi-Fi settings can only be used to set up an unconfigured AirPort Express.

Setting Advanced Options
To set advanced options, use AirPort Utility on your computer or download AirPort Utility from the App Store. You can configure advanced settings, such as selecting wireless channels, closed networks, access control, user accounts, security options, and more.
To set advanced options or make changes to a network you’ve already set up:

1 Choose the wireless network you want to change.
   - *On a Mac,* use the Wi-Fi status menu in the menu bar.
   - *On a Windows computer,* hold the pointer over the wireless connection icon until you see your AirPort network name (SSID), and then choose it from the list if there are multiple networks available.
   - *On an iOS device,* choose the network in Wi-Fi Settings.

If you haven’t set up your AirPort Express, the default network name for an Apple base station is AirPortNetwork xxxxxx, where xxxxxx is the last six digits of the AirPort ID.

2 Open AirPort Utility.

3 If there’s more than one base station in the list, select the one you want.
   - If you don’t see it, click Rescan.

4 If you’re prompted for a password, enter it.

5 Adjust the settings you want to adjust for your Airport Express or the network.

For more about wireless networking and the advanced features of AirPort Utility, see *Apple AirPort Networks* at www.apple.com/support/airport.
Using AirPort Express to Stream Music

If you connect AirPort Express to your stereo or powered speakers, you can use AirPlay to play music from iTunes on any computer or from an iOS device on your network.

To set it up:
1. Connect the Audio Out port on your AirPort Express to your home stereo or powered speakers. Use a digital fiber optic cable, an analog mini-stereo-to-dual-RCA cable, or a mini-stereo to mini-stereo cable, depending on what type of connectors your stereo uses.

   Note: You cannot use USB speakers with your AirPort Express. Use powered speakers with a stereo mini-jack connector.

2. To join the wireless network:
   - On a Mac, use the AirPort status menu in the menu bar.
   - On a Windows computer, hold the pointer over the wireless connection icon until you see your AirPort network name (SSID), and choose it from the list if there are multiple networks available. Enter the network password if necessary.
   - On an iOS device, choose the network you want to join from the list of networks in Wi-Fi settings.
3 Use AirPlay to stream music to your stereo or speakers:

- **On a Mac or Windows computer**, open iTunes and choose your AirPort Express from the AirPlay pop-up menu () in the lower-right corner of the iTunes window.

- **On an iOS device**, choose the AirPort Express you want to use from the AirPlay pop-up menu ().

If you have more than one AirPort Express, you can connect one to the stereo in your living room and connect another to the powered speakers in your den, for example. Using AirPlay, you can stream your iTunes music from any computer or wireless device on the network to any AirPort Express in your house.

You can also stream music to more than one AirPort Express simultaneously using iTunes, but only one device at a time can stream music to an AirPort Express.
Tips and Troubleshooting

You can quickly solve most problems with AirPort Express by following the advice in this chapter.

Best Locations for AirPort Express

The following recommendations can help your AirPort Express achieve the best wireless range and network coverage.

- Place your AirPort Express in an open area where there are few obstructions, such as large pieces of furniture or walls. Place it away from metallic surfaces.
- Avoid placing your AirPort Express behind furniture or inside cabinets.
- Don’t lay your AirPort Express on its side.
- Don’t place your AirPort Express in areas surrounded by metal surfaces on three or more sides.
- If you put your AirPort Express in an entertainment center with your stereo equipment, don’t surround AirPort Express with audio, video, or power cables. Place your AirPort Express so the cables are to one side. Keep as much space as possible between AirPort Express and the cables.
- Place your AirPort Express at least 25 feet (8 meters) from any microwave oven, 2.4 GHz cordless phone, or other source of interference.
Avoiding Interference

The following items can cause interference with Wi-Fi communication:

- Microwave ovens
- Direct Satellite Service (DSS) radio frequency leakage
- The original coaxial cable that may come with a satellite dish. Contact the device manufacturer and get newer cables.
- Electrical devices such as power lines, electrical railroad tracks, and power stations.
- Cordless telephones that operate in the 2.4 GHz range. If you have problems with your phone or AirPort communication, change the channel that your AirPort Express uses.
- Adjacent base stations using nearby channels. For example, if device A is set to channel 1, device B should be set to channel 6 or 11. For best results, use channel 1, 6, or 11 when operating your device in the 2.4 GHz range.

The farther away the interference source, the less likely it is to cause a problem.

Problems and Solutions

If the AirPort Software Can’t Detect your AirPort Express

Make sure that the Mac you’re using has Wi-Fi. Use the Wi-Fi status menu on the menu bar to make sure Wi-Fi is turned on.
If you’re using a Windows computer, make sure the wireless card or adapter is installed correctly. To check the connection, see the documentation that came with your computer.

If You Can’t Play Music from iTunes on Your Stereo
- Make sure that your AirPort Express is plugged into a power outlet and is in range of your computer or wireless device, and that you connected the appropriate cables. You may need to join the AirPort Express network.
- Make sure you’ve chosen your AirPort Express from the AirPlay pop-up menu ( السبت ) in the iTunes window on your computer, or from the AirPlay pop-up menu on your iOS device.
- Make sure you’re using iTunes v10.4 or later on your computer.

If You Can’t Hear Music Playing
If music is playing (the playback head in the progress bar at the top of the iTunes window is moving) but you can’t hear anything, check the following:
- Make sure your remote speakers are selected in the AirPlay pop-up menu (أربطة) in the iTunes window on your computer, or in the AirPlay pop-up menu on your iOS device. Also make sure the volume on the remote speakers isn’t turned down.
- Make sure your stereo or powered speakers are turned on, and the volume is turned up.
If You Forget Your Network or AirPort Express Password
You can clear the AirPort network password or AirPort Express password by resetting AirPort Express.

To reset your AirPort Express and network passwords:
1 Use the end of a straightened paper clip to press the reset button for one second.
2 Select your AirPort network.
   On a Mac, use the AirPort status menu in the menu bar to select the network created by AirPort Express (the network name doesn’t change).
   On a Windows computer, hold the pointer over the wireless connection icon until you see your AirPort Network Name (SSID), and then select it.
3 Open AirPort Utility.
4 Select your AirPort Express and click Configure.
5 In the dialog that appears, make the following changes:
   • Reset the AirPort Express password.
   • Turn on encryption to activate password protection for your AirPort network. If you turn on encryption, enter a new password for your AirPort network.
6 Click OK.
   AirPort Express restarts and loads the new settings.
If Your AirPort Express Isn’t Responding
Unplug it from the power outlet and plug it back in.

If your AirPort Express stops responding completely, you may need to reset it to its factory settings. This erases all of the settings you’ve made and resets them to their original values.

To return your AirPort Express to its factory settings:
- Use the end of a straightened paper clip to hold down the reset button for ten seconds.

AirPort Express restarts with the following settings:
- AirPort Express receives its IP address using DHCP.
- The network name reverts to AppleNetwork xxxxxx (where x is a letter or number).
- The AirPort Express password reverts to public.

If you previously used AirPort Utility to create profiles for your AirPort Express, they’re preserved when you reset your AirPort Express. If you need to return your AirPort Express to its factory settings and remove any profiles you’ve set up:

1 Unplug AirPort Express.
2 Use the end of a straightened paper clip to hold down the reset button while you plug in AirPort Express.

Wait until the status light flashes, and then reset the base station.
If Your AirPort Express Status Light Flashes Amber
The Ethernet cable may not be connected properly, your AirPort Express may be out of range of an AirPort network, or there may be a problem with your Internet service provider.

If you’re connected to the Internet with a DSL or cable modem, the modem may have lost its connection. Even if the modem seems to be working properly, try disconnecting the modem from its power supply, waiting a few seconds, and then reconnecting it. Make sure your AirPort Express is connected directly to the modem via Ethernet before reconnecting power to the modem.

For information about why the light is flashing amber, open AirPort Utility on your computer or iOS device, and select your base station. Enter the base station password if necessary, and then select your AirPort Express to display status information.

On a computer, you can also select the “Monitor base station for problems” checkbox in AirPort Utility preferences. If the base station has a problem, AirPort Utility opens and helps you solve it.

If You Want to Update Your AirPort Express Software
Apple periodically updates AirPort Utility. To download the latest version:
• On a Mac or Windows computer, go to www.apple.com/support/airport.
• On an iOS device, go to the App Store.
To update your AirPort Express firmware from a computer:
1. Open AirPort Utility.
2. Select your AirPort Express.
3. Click Update next to the version number.

To update your AirPort Express firmware from an iOS device:
- Open AirPort Utility, select your AirPort Express, and then tap Version.
Learning More, Service, and Support

You can find more information about using AirPort Express in onscreen help and on the web.

Onscreen Help on Your Computer
To learn more about using AirPort, open AirPort Utility and choose Help > AirPort Utility Help.

Online Resources
For the latest information about AirPort Express, go to www.apple.com/airportexpress.

To register your AirPort Express, go to www.apple.com/register.

For AirPort service and support information, forums with product-specific information and feedback, and the latest Apple software downloads, go to www.apple.com/support/airport.

For support outside the United States, go to www.apple.com/support and choose your country from the pop-up menu.
Obtaining Warranty Service
If your AirPort Express appears to be damaged or doesn’t function properly, follow the advice in this booklet, the onscreen help, and the online resources.

If your AirPort Express still doesn’t function properly, go to www.apple.com/support and click Check Your Service & Support Coverage for information about obtaining warranty service.

Finding the Serial Number of Your AirPort Express
The serial number is printed on the bottom of your AirPort Express.
Specifications and Safety

AirPort Specifications
- Frequency Band: 2.4 and 5 gigahertz (GHz)
- Standards: 802.11n Wi-Fi

Interfaces
- RJ-45 10/100Base-T Ethernet WAN ()
- RJ-45 10/100Base-T Ethernet LAN ()
- Universal Serial Bus (USB) 2.0 ()
- Analog/digital optical 3.5 mm mini-jack ()
- Simultaneous dual-band 802.11n Wi-Fi

Environmental Specifications
- Operating Temperature: 32°F to 95°F (0°C to 35°C)
- Storage Temperature: −13°F to 140°F (−25°C to 60°C)
- Relative Humidity (Operational): 20% to 80% relative humidity
- Relative Humidity (Storage): 10% to 90% relative humidity, noncondensing
• *Operating Altitude:* 0 to 10,000 feet (0 to 3048 m)
• *Maximum Storage Altitude:* 15,000 feet (4572 m)

**Size**
• *Length:* 3.9 inches (98 mm)
• *Width:* 3.9 inches (98 mm)
• *Thickness:* .9 inches (23 mm)

**AirPort Express Safety Tips**
• The only way to completely shut off power to your AirPort Express is to disconnect it from the power source.
• Your AirPort Express is a high-voltage component. Do not open it for any reason, even if it’s unplugged. If your AirPort Express needs service, see “Learning More, Service, and Support” on page 25.
• Never force a connector into a port. Make sure that the connector matches the port and that you position the connector correctly in relation to the port.
Avoid Wet Locations

**WARNING:** To reduce the chance of shock or injury, do not use your AirPort Express in or near water or wet locations.

- Keep AirPort Express away from sources of liquid, such as drinks, washbasins, bathtubs, or shower stalls.
- Protect AirPort Express from rain or other moisture.
- Take care not to spill any food or liquid on your AirPort Express. If you do, unplug AirPort Express before cleaning up the spill.

In case of a spill, you may need to send your equipment to Apple for service. See, “Learning More, Service, and Support” on page 25.

Do Not Make Repairs Yourself

**WARNING:** Do not attempt to open your AirPort Express or disassemble it. You run the risk of electric shock and voiding the limited warranty. No user-serviceable parts are inside.
Regulatory Compliance Information

FCC Compliance Statement
This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. See instructions if interference to radio or television reception is suspected.

Radio and Television Interference
This computer equipment generates, uses, and can radiate radio-frequency energy. If it is not installed and used properly—that is, in strict accordance with Apple’s instructions—it may cause interference with radio and television reception.

This equipment has been tested and found to comply with the limits for a Class B digital device in accordance with the specifications in Part 15 of FCC rules. These specifications are designed to provide reasonable protection against such interference in a residential installation. However, there is no guarantee that interference will not occur in a particular installation.

You can determine whether your computer system is causing interference by turning it off. If the interference stops, it was probably caused by the computer or one of the peripheral devices.

If your computer system does cause interference to radio or television reception, try to correct the interference by using one or more of the following measures:
• Turn the television or radio antenna until the interference stops.
• Move the computer to one side or the other of the television or radio.
• Move the computer farther away from the television or radio.
• Plug the computer into an outlet that is on a different circuit from the television or radio. (That is, make certain the computer and the television or radio are on circuits controlled by different circuit breakers or fuses.)

If necessary, consult an Apple Authorized Service Provider or Apple. See the service and support information that came with your Apple product. Or, consult an experienced radio/television technician for additional suggestions.

Important: Changes or modifications to this product not authorized by Apple Inc. could void the EMC compliance and negate your authority to operate the product.
This product was tested for FCC compliance under conditions that included the use of Apple peripheral devices and Apple shielded cables and connectors between system components. It is important that you use Apple peripheral devices and shielded cables and connectors between system components to reduce the possibility of causing interference to radios, television sets, and other electronic devices. You can obtain Apple peripheral devices and the proper shielded cables and connectors through an Apple-authorized dealer. For non-Apple peripheral devices, contact the manufacturer or dealer for assistance.

Wireless Radio Use
This device is restricted to indoor use when operating in the 5.15 to 5.25 GHz frequency band.

Cet appareil doit être utilisé à l’intérieur.

Exposure to Radio Frequency Energy
The radiated output power of the AirPort Card in this device is below the FCC and EU radio frequency exposure limits for uncontrolled equipment. This device should be operated with a minimum distance of at least 8 inches (20 cm) between the AirPort Card antennas and a person’s body and must not be co-located or operated with any other antenna or transmitter subject to the conditions of the FCC Grant.

Canadian Compliance Statement
This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Cet appareil est conforme aux normes CNR exemptes de licence d’Industrie Canada. Le fonctionnement est soumis aux deux conditions suivantes : (1) cet appareil ne doit pas provoquer d’interférences et (2) cet appareil doit accepter toute interférence, y compris celles susceptibles de provoquer un fonctionnement non souhaité de l’appareil.

Industry Canada Statement
Complies with the Canadian ICES-003 Class B specifications. Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada. This device complies with RSS 210 of Industry Canada.
Europe–EU Declaration of Conformity

**English** Hereby, Apple Inc. declares that this WLAN Access Point is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.

会 (VCCI) の基準に基づくクラス B 情報技術装置で
す。この装置は家庭環境で使用されることを目的と
していますが、この装置がラジオやテレビジョン受
信機に近接して使用されると、受信障害を引き起こすことがあります。
取扱説明書に従って正しい取扱をしてください。
Disposal and Recycling Information

This symbol indicates that your product must be disposed of properly according to local laws and regulations. When your product reaches its end of life, contact Apple or your local authorities to learn about recycling options.

For information about Apple’s recycling program, go to www.apple.com/recycling.

European Union — Disposal Information

The symbol above means that according to local laws and regulations your product should be disposed of separately from household waste. When this product reaches its end of life, take it to a collection point designated by local authorities. Some collection points accept products for free. The separate collection and recycling of your product at the time of disposal will help conserve natural resources and ensure that it is recycled in a manner that protects human health and the environment.

Türkiye
EEE yönetmeliğine (Elektrikli ve Elektronik Eşyalarda Bazı Zararlı Maddelerin Kullanımının Sınırlandırılmasına Dair Yönetmelik) uygundur.

Brasil—Informações sobre descarte e reciclagem

O símbolo acima indica que este produto e/ou sua bateria não devem ser descartadas no lixo doméstico. Quando decidir descartar este produto e/ou sua bateria, faça-o de acordo com as leis e diretrizes ambientais locais. Para informações sobre o programa de reciclagem da Apple, pontos de coleta e telefone de informações, visite www.apple.com/br/environment.

Battery Disposal Information

Dispose of batteries according to your local environmental laws and guidelines.

Nederlands: Gebruikte batterijen kunnen worden ingeleverd bij de chemokar of in een speciale batterijcontainer voor klein chemisch afval (kca) worden gedeporteerd.

台灣

廢電池請回收
China Battery Statement
警告：不要刺破或焚烧。该电池不含水银。

O: 表示该有毒有害物质在该部件所有均质材料中的含量均在 SJ/T 11363-2006 规定的限量要求以下。
X: 表示该有毒有害物质至少在该部件的某一均质材料中的含量超出 SJ/T 11363-2006 规定的限量要求。

根据中国电子行业标准 SJ/T11364-2006，本产品及其某些内部或外部组件上可能带有环保使用期限标识。取决于组件和组件制造商，产品及其组件上的使用期限标识可能有所不同。组件上的使用期限标识优先于产品上任何与之相冲突的或不同的使用期限标识。
